AS A COMPANY
we have taken the Operation Clean Sweep (OCS) pledge

Operation Clean Sweep® is an international program designed to help prevent resin pellet, flake and powder loss and help keep resin out of the marine environment. Every segment of the plastics industry has a role to play—including resin producers, transporters, bulk terminal operators and plastics processors—by implementing good housekeeping and resin containment practices.

As our transportation partner we ask that you join us in our OCS pledge to help achieve the goal of zero resin pellet, flake and powder loss.

VISIT
www.opcleansweep.org
to learn more about the US OCS program and access tools that can help your company work toward zero resin pellet, flake and powder loss.

WE ONLY GET ONE WORLD
Please stand with us and your peers in the plastics industry to ensure there is zero resin pellet, flake and powder loss into our environment

WORKING TOGETHER TO STOP RESIN LOSS
Help Us to Prevent Resin Pellet, Flake and Powder Loss Into the Environment

OPCLEANSWEEP.ORG
The value of OCS

Spilled resin pellets, flakes and powder can make their way into local waters and eventually end up in our oceans where they create both a litter problem and a threat to sea life. Zero resin pellet, flake and powder loss can only be achieved with your help.

By helping us adhere to our OCS pledge or by joining us by taking the pledge yourself, the environment wins and so does the plastics industry.

By implementing OCS practices and principals we strengthen our:

- Contribution to preserving water quality and wildlife
- Compliance with federal, state, provincial and municipal regulations
- Employee health and safety
- Operational efficiency

We ask you to join us by taking the pledge

FOR TOOLS AND GUIDELINES

to help you with this task, please refer to the OCS website and the manual

- [www.opcleansweep.org](http://www.opcleansweep.org)
- [www.opcleansweep.org/manual](http://www.opcleansweep.org/manual)

Take it a step further and take the OCS pledge yourself! This voluntary stewardship program is easy to join, and you’ll be recognized.

JOIN your supply chain colleagues in the plastics industry by following key housekeeping procedures to eliminate resin from entering waterways in the U.S.

We ask that you:

1. **Join us** in this commitment to achieve zero resin loss into the environment

2. **Conduct an audit** of your process to identify areas that could be of concern and identify ways to address them

3. **Discuss any concerns** with us so we can help find a solution

4. **Raise awareness** among your employees and create accountability

5. **Follow up and enforce procedures** when management cares, employees will, too!
